

Project Name	Pogo Gakkō
Team Name	Team Tomodachi
Team Members	Windjy Jean, Andrew Godfroy, Patrick Gingras, Patrick Cowan, Sarah Liu
Project Manager	Windjy Jean
Report Week	Reading Week (Feb 14, 2019 - Feb 20, 2019) Week 4 (Feb 21, 2019 - Feb 27, 2019)
Report Date	Feb 27, 2019

Overall Status

Green In progress on schedule

Amber At risk to complete as scheduled; recovery plan in place

Red Will not start/stop as planned; recovery plan required

Windjy Jean Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Meet with teammates to discuss CSS structure and practices	50	Figuring out a customized CSS structure standard with the Front-End members.	
Complete Front-End section of Technical Recommendations Document	100		
Set up technology stack and Docker container for development environment	25	Docker will be used with our project for repo and deployment strategy purposes. Currently researching.	
Create wireframes of the web pages for this app	0	We do have two mockups thanks to Sarah, but we do need to figure out how	

		to draw the rest of the webpages.	
Focus For Next Week			
Continue with Ionic training, figure out CSS writing styles of Front-End members, and draw wireframes for the app pages.			

Andrew Godfroy Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Complete Back-End section of Technical Recommendations Document	100		
Set up technology stack and Docker container for development environment	100		
Complete the development of our Authentication Server	50	Development on our Authentication Server has begun. We are about half way through the completion of the configuration of IdentityServer	
Focus Next Week			
Continue the development of our Authentication Server. Have the ability for Users to create accounts in the auth system and authenticate themselves using OAuth.			

Patrick Gingras Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Complete Back-End	100		

section of Technical Recommendations Document			
Set up technology stack and Docker container for development environment	100		
Set up RabbitMQ (asynchronous message queue)	50	The docker files have been written for the RabbitMQ instance, but the services need to connect to it.	
Focus Next Week			
Finish configuring the message queue and connect to it successfully from the services.			

Patrick Cowan Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Meet with teammates to discuss CSS structure and practices	50	Discussions on styling and layout standards are ongoing.	
Complete Front-End section of Technical Recommendations Document	100	Front end technical recommendations are completed. We are performing a final editing overview before submitting.	
Set up technology stack and Docker container for development environment	25	Research into our implementation with docker is ongoing. We are collaborating with the back-end team to form a proper implementation plan.	
Contribute and collaborate with front-end team members on wireframes.	0	Currently collaborating with front-end team members.	

Focus Next Week			
Continue to work with Ionic framework. Begin to create drafts for the foundation of our layouts using Ionic.			

Sarah Liu Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Meet with teammates to discuss CSS structure and practices	50	Met to discuss structural components. Will continue to meet to discuss best practices.	
Set up technology stack and Docker container for development environment	25	On pause as I work on design aspects.	
Create web page wireframes that incorporate CSS configurations	25	The base design is complete as we have already completed the mockups. My portion of the wireframes aims to set technical guidelines for the CSS styles.	
Create original assets or find free assets for project to avoid copyright limitations	0	Will create required assets as vectors in Illustrator, or use free assets where available.	
Review technical recommendations document written by my teammates	25	I have read the technical recommendations document. I need to begin the editing process.	
Focus Next Week			
My priority will be to review and edit technical recommendations document. I will then create the CSS guidelines such that our team has a cohesive understanding of how we proceed with our front-end styling.			

Project Level Risks:

As we are building the client's project from scratch, we need to create a base upon which to build the requested features. Our current goal is to develop a foundation upon which everything else can rest, meaning that we need to research different components and frameworks and develop a solid system that can be expanded upon in the future.
