

Project Name	Pogo Gakkō
Team Name	Team Tomodachi
Team Members	Windjy Jean, Andrew Godfroy, Patrick Gingras, Patrick Cowan, Sarah Liu
Project Manager	Windjy Jean
Report Week	Week 3 (Feb 07, 2019 - Feb 13, 2019)
Report Date	Feb 13, 2019

Overall Status

Green **In progress on schedule**

Amber **At risk to complete as scheduled; recovery plan in place**

Red **Will not start/stop as planned; recovery plan required**

Windjy Jean Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Consolidate results of research and propose front-end framework to group prior to client	100		
Meet with client to discuss and receive feedback on proposed front-end technologies	100		
Complete Front-End section of Technical Recommendations Document	25	At the moment, we have written up a general summary of what the Front-End consists of. May or may not require more detail.	Delayed due to Current Trends project. Will resume development after the 14th of February.
Set up technology stack and Docker container for development	25	Docker will be used with our project for repo and deployment strategy	Delayed due to Current Trends project. Will resume development after the 14th of

environment		purposes. Currently researching.	February.
Focus For Next Week			
Commence training on the selected front-end framework and potentially start coding a foundation for the project.			

Andrew Godfroy Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Consolidate results of research and propose back-end framework to group prior to client	100		
Meet with client to discuss and receive feedback on proposed back-end technologies	100	Technologies have been approved and development has begun	
Complete Back-End section of Technical Recommendations Document	75	We have completed our first pass of the document. Awaiting fleshing out of marked sections and second pass before handoff	Completion delayed due to lead up of Current Trends presentation
Set up technology stack and Docker container for development environment	25	I have begun the process of getting our Development Environment setup. Azure Pipelines have been deployed for CI	Completion delayed due to lead up of Current Trends presentation
Focus Next Week			
Begin development. Bootstrapping the project and getting our dependencies and developer layouts setup. Get IdentityServer4 setup.			

Patrick Gingras Objectives:

Overall Status (Red, Amber, Green)	Green
---	--------------

Tasks	%	Status	Risks /Issues
Consolidate results of research and propose back-end framework to group prior to client	100		
Meet with client to discuss and receive feedback on proposed back-end technologies	100		
Complete Back-End section of Technical Recommendations Document	75	We have decided on what technologies we will use, and have discussed with the client. We have nearly finished a more formal document that goes more in depth into the individual softwares we decided on.	
Set up technology stack and Docker container for development environment	25	We have begun to plan out the structure of our repository and the deployment strategy for our code.	
Focus Next Week			
Conclude discussions about deployment and repository structure. Start writing some deployment scripts to determine the format that will work for our use case.			

Patrick Cowan Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Consolidate results of research and propose front-end framework to group prior to client	100		
Meet with client to discuss and receive feedback on proposed front-end technologies	100		
Complete Front-End	25	We have general ideas	Our group has experienced

section of Technical Recommendations Document		and notes of what technologies and ideas we have to build the Front-End.	delays due to a change in focus to a presentation that will be performed by us this week.
Set up technology stack and Docker container for development environment	25	Begun to research and build an understanding of Docker and its use within our project.	Our group has experienced delays due to a change in focus to a presentation that will be performed by us this week.
Focus Next Week			
Continue training and familiarization with Ionic and front end frameworks, themes, and layout options. Formally conclude our technology recommendations in writing, and set up coding conventions with my teammates.			

Sarah Liu Objectives:

Overall Status (Red, Amber, Green)	Green		
Tasks	%	Status	Risks /Issues
Create front-end visual mockup of web application as it will appear on mobile devices	100		
Consolidate visuals and present mockup to group for feedback prior to client proposal	100		
Meet with client to discuss and receive feedback on proposed mockup	100		
Set up technology stack and Docker container for development environment	25	I learned about the utility of Docker as a container platform that will effectively allow us to share and manage our technologies	Currently experiencing delays due to our concurrent Current Trends project, which we will complete later this week
Focus Next Week			

To set up and familiarize myself with the frameworks and technologies chosen by my teammates.

Project Level Risks:

As we are building the client's project from scratch, we need to create a base upon which to build the requested features. Our current goal is to develop a foundation upon which everything else can rest, meaning that we need to research different components and frameworks and develop a solid system that can be expanded upon in the future.
